

REMARKS:

The title has been amended because there are no method claims. Claim 1 has been amended so it is similar to unentered claim 1 of the parent application. Claim 3 of the parent application now depends on claim 1 of this application and claims 7-12 of the parent, in modified form, now depend, either directly or indirectly on claim 1 of this application. Claim 14 of the parent has been amended so it does not require the first and second resistive elements to be first and second resistors. New claim 20 is similar to claim 14, but only requires the driver to include a first transistor and the circuitry for driving the first transistor; i.e., claim 20 does not include the second transistor of the driver and its associated circuitry. Applicants cancel claims 2, 4-6, 13, 15 and 19 because of the coverage provided by the allowed claims of the parent application.

Entry is in order.

To the extent necessary, a petition for an extension of time under 37 C.F.R. 1.136 is hereby made. Please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to Deposit Account 08-2025 and please credit any excess fees to such deposit account.

Respectfully submitted,

LOWE HAUPTMAN GILMAN & BERNER, LLP
